FUTURE DECISION OPTION

The Gila River Nation could refuse to continue sales to cities and the federal government that allow them to meet their storage requirements.

This would dramatically impact their public polling.

While this will almost certainly lead to extensive legal costs, it is available if you have few other options.

Against ☐

DECISION 2

The Gila River Nation refuses to continue sales to cities and the federal government that allow them to meet their storage requirements.

Cities will lose 3 additional Medium Water Rights from their Storage and the US Senator will lose 5% of his public support.

This will cost you a significant percentage of your total revenues.
